INVITATION TO BIDDERS

PROJECT TITLE

Elephant Retaining Wall Stabilization II RFP 2025

BACKGROUND

This project was previously advertised with a proprietary specification for the turnbuckle anchors. It was cancelled due to lack of bids. The revised request for proposals allows interested contractors to design and bid an approved, equivalent hollow-bar soil anchor system that meets the performance criteria stated in the attached scope narrative.

SCOPE OF WORK

The Saint Louis Zoo is seeking qualified contractors to submit proposals to preform stabilization work to an existing retaining wall on the south side of the Elephant Management Facility. A 70-foot-long section of the retaining wall, constructed in 1998, has developed some large diagonal cracks and a section of the wall is visibly out of plane near a heavy steel swing gate. The gate on the out-of-plane wall is functional and no corrective measures to re-plumb this wall are needed, only stabilization.

A recent architectural and structural review has recommended stabilizing the retaining wall with 15 geotechnical turnbuckle anchors at 5 ft o.c. of varying depths and staggered heights. The wall will be tied to another gunite retaining wall in the adjacent elephant habitat. The distance between these two retaining walls is +/- 20'-0 and is filled with soil, plants and trees that form a visual barrier between the public view of the habitat and the Elephant Management Facility. To help relieve hydrostatic pressure on the wall, the scope also includes drilling weep holes at 6'-0" o.c.

See Attachment 1 & 2 for additional information.

- 2. The bid documents contain the available information about the work and the conditions pertaining thereto. Information obtained from any officer, agent, or employee of the Saint Louis Zoo, or from any other person, will not relieve the vendor's responsibility to assume all risks and obligations pertaining to the work, and to fulfill the conditions of the contract. Bidders are required to satisfy themselves as to the accuracy of the estimated quantities in the bid documents, and must thoroughly examine the site and review the bid documents, including addenda, if any, before submitting a bid.
